

## **APPENDICES**

## PRAENOTANDA

1. References to Scriptural passages are given in accordance with the Douay-Rheims Version and, in parentheses, in accordance with the King James Version.
2. Many of the source-references in the notes to the sermons are taken from the printed edition of the Latin texts. (Not all of these editorial references to sources are repeated in the present English notes; thus, some readers will want to consult the Latin editions directly.)
3. In the translations brackets are used when *English words* are inserted to round out the meaning of a condensed Latin passage. When *Latin words* are inserted into the translation for purposes of clarification, they are inserted in brackets if their case-endings have been changed to the nominative case; they are inserted in parentheses where the Latin text itself already has the nominative case.
4. The abbreviation '*PL*' stands for *Patrologia Latina*, edited by J.-P. Migne.
